SCRUM Meeting 1:
TODO:
1. Profile page. Name, major, year, profile picture
   a. The profile form
   b. Server logic on save or edit
   c. Lock routing until profile complete
2. Google Authentication
   a. Users will be able to sign in with their Fresno State email address through Google
3. Email Sign In
   a. Users can sign in with Fresno State email address with normal email and password
4. Colors
   a. We are going to choose the design (colors, text colors, background, etc.)

Test Cases:
1.Email log in: Only emails with mail.fresnostate.edu will be accepted. Passwords' minimum length will be 6 characters.

2. Create Profile Page: Users can only make a profile once they have uploaded their profile pic, put a name, major, and year. Users will be redirected to create profile pages if they do not have an account.

3. Edit Profile Button: Users are redirected to another page to be able to edit their profiles. They are able to change things once on this page and then save it again to update their profile.
